PROFESSIONAL SUMMARY

Backend-Focused Full-Stack Developer with hands-on experience building scalable web applications, RESTful APIs, and database-driven platforms using ASP.NET Core, C#, SQL Server, FastAPI, and Angular. Experienced in developing production-ready modules for enterprise management systems, SaaS platforms, and AI-powered automation solutions. Strong foundation in backend architecture, authentication, API integration, database optimization, and software engineering best practices. Eager to contribute to large-scale enterprise and infrastructure projects in a fast-paced, high-impact environment.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, TypeScript, SQL

Backend: ASP.NET Core, ASP.NET MVC, FastAPI, REST APIs, Entity Framework Core, Web API

Frontend: Angular, React, HTML, CSS, Bootstrap

Databases: Microsoft SQL Server, MySQL

Tools & Platforms: Git, GitHub, Postman, Railway, Streamlit, LangChain, Generative AI, API Integration

Core Concepts: Authentication, Authorization, RBAC, Database Design, MVC Architecture, OOP, CRUD Operations, API Development, Scalable Architecture, Workflow Automation

EXPERIENCE

Software Development Intern

Present

ICMT College Care – Education Management System

Delhi, India

- Developed backend modules for admissions, student records, fee management, and academic workflows using ASP.NET Core and SQL Server.
- Designed and integrated RESTful APIs with role-based authentication and authorization systems (RBAC) to enforce secure, multi-level access control.
- Optimized SQL queries and database operations, improving application performance and reliability for real-world administrative workflows.
- Collaborated on scalable system architecture and automated end-to-end administrative processes for an enterprise education management platform.

PROJECTS

College Care – Education Management System | *ASP.NET Core, SQL Server, MVC, Web API*

- Built scalable enterprise modules covering admissions, examinations, results, fee processing, dashboards, and reporting systems for institutional administration.
- Implemented end-to-end authentication, authorization, activity tracking, and role-based access control (RBAC) for multiple user types.
- Designed normalized SQL Server database schemas and applied query optimization techniques to enhance backend performance and data integrity.

BixerWebApp – URL Indexer SaaS Platform | *ASP.NET Core, SQL Server, MVC*

- Developed a full-featured SaaS platform with integrated wallet system, authentication, user dashboard, and credit-based URL submission workflows.
- Designed a relational database architecture with 15+ tables covering users, transactions, URL submissions, and tracking logs for complete audit trails.
- Implemented Admin, SuperAdmin, and User role-based management systems with differentiated access levels and permissions.
- Built retry mechanisms, batching systems, and real-time submission status tracking to ensure platform reliability and operational transparency.

TailorTalk – AI Appointment Assistant | *FastAPI, LangChain, Streamlit, Google Calendar API*

- Built an AI-powered appointment scheduling assistant with automated booking workflows using LangChain and FastAPI.
- Integrated Google Calendar APIs with secure OAuth authentication and real-time scheduling synchronization.
- Developed scalable backend microservices with clean API design and intelligent conversational flow management.

EDUCATION

Bachelor of Computer Applications (BCA)	2023 – 2026
<i>SDIMT, Delhi</i>	<i>Delhi, India</i>
Class XII	2023
<i>Senior Secondary</i>	<i>Delhi, India</i>
Class X	2021
<i>Secondary</i>	<i>Delhi, India</i>

ADDITIONAL INFORMATION

Backend Architecture: Strong understanding of backend system design, REST APIs, database optimization, and scalable web architecture for enterprise-grade applications.

Enterprise Systems: Hands-on experience with real-world management systems, multi-tenant SaaS platform development, and large-scale workflow automation.

Problem Solving: Active problem solver with continuous learning focus in full-stack and backend engineering; strong ability to adapt to complex domain requirements.
